Microsoft Azure Solutions Architect Certification Transition Exam

## Questions & Answers Demo

## Version: 8.0

	Mix	Questio	ns
--	-----	---------	----

Question:	1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

You use ASP.NET Core MVC with ADO.NET lo develop an application. You implement database shard.ng for the application by using Azure SQL Database. You establish communication links between the shard databases.

You need to implement a strategy that allows a group of operations that are performed on multiple Azure databases to be rolled back on all databases if any of the operations fail.

Solution:

Deploy a SQL database instance in an Azure Virtual Machine (VM).

- Establish linked servers to each Azure SQL Database instance from the SQL Server instance in the VM.
- Create a stored procedure in the VM that performs the update operations using a distributed transaction and commits them if successful.
- Run the SQL stored procedure on the SQL Server instance in the VM.

Does the solution meet the goal?

A. Yes	
B. No	
	Answer: A
	Allswel. A

#### Question: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions with not appear in the review screen.

You need to deploy resources to host a stateless web app in an Azure subscription The solution must meet the following requirements:

- Provide access to the full .NET framework.
- Provide redundancy it an Azure region fails.
- Grant administrators access to the operating system to install custom application dependencies.

Solution: You deploy an Azure virtual machine to two Azure regions, and you create a Traffic Manager profile.

Does this meet the goal?

A. Yes

B. No

Answer: A

### Question: 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

You need to deploy resources to host a stateless web app in an Azure subscription. The solution must meet the following requirements:

- Provide access to the full .NET framework.
- Provide redundancy it an Azure legion fails.
- Grant administrators access to the operating system to install custom application dependencies.

Solution: You deploy a web app in an Isolated App Service plan. Does this meet the goal?

A. Yes

B. No

Answer: A

#### Question: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear in the review screen.

You need to deploy resources to host a stateless web app in an Azure subscription. The solution must meet the requirements:

- . Provide access to the full .Ni I framework.
- . Provide redundancy if an Azure region fate
- . Gram administrators access to the operating system to install custom application dependencies.

Solution: You deploy a virtual machine scale set that uses auto scaling.

Does this meet the goal?

A. Yes B. No

**Answer: B** 

#### **Question: 5**

#### DRAG DROP

You develop a bot by using Language Understanding Intelligence Service (LUIS) and the .NE1 Bot framework. You use LUIS in the Azure portal to optimize the bot.

You review the utterances and determine that users are requesting time and venue information for events.

You need to improve the prediction efficiency of the bot.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct reel order.

Answer:
